

HB 6592

My family and I have used homeopathy for years as an alternative and in conjunction with traditional medicine.

I urge you to give homeopathy legitimate status and the ability to practice legally. Let us have access to fuller options for health care.

As a case in point my daughter had a cyst on her finger and the hand surgeon recommended surgery to remove it. He said it could wait 6 months before it would complicate the tendons. With that time we consulted our homeopath, who prescribed a remedy. The cyst was gone in a week! No surgery.

My life has been improved immensely with homeopathy.

We just want a choice. And homeopathy, highly trained practitioners, should not be threatened.

Thank you for your consideration.

Joanne Lenore
